RESUMÉ

As a frontend developer, I am passionate about creating exceptional solutions that are user-friendly and of high quality. I use my ever-growing desire to develop with a user-centered approach from idea to final solution. I do this both independently and in teams, where I collaborate with my peers to come up with the best solution. I excel at handling complex and logical tasks, but I am equally passionate about creating user-friendly designs. As a colleague, I am highly observant and dedicated. I am not outspoken but calm and deeply committed to what I do.
